**The National Self Build
& Renovation Centre**

For 2010, the National Self Build & Renovation Centre has put together a packed calendar of shows, events, seminars and workshops, to support self builders and renovators with their homebuilding projects throughout the year. From events covering design and planning ideas, meeting building regulations, and project management to eco building, renovating and improving, and affordable homebuilding, the Centre and its inspiring events can provide the ideas, advice and guidance to ensure your project is a success.

The events calendar kicks off with the three-day National Self Build & Renovation Show in February (26th - 28th). The Show will offer an opportunity for homeowners looking to escape the turmoil in the housing market to get the advice, information and inspiration they need to build or improve their own home. The Show offers a packed programme of seminars, and presentations, covering how to find land or a project, funding a project, understanding project management, eco technology, and much more. A variety of experts will also be on hand for one-to-one consultations, including architects, project managers, building control, CAD Designers and surveyors.

Visitors can also take a guided tour of the EDF Energy Renovation House and exclusive self build education journey; see live building demonstrations, check out hundreds of products in the Trade Village, examine the structure of the timber Wolseley House and hear the trials, tribulations and successes of other self builders and renovators.

For details on all the events for 2010, visit www.mykindofhome.co.uk or call 01506 409 616
