

# What's On?

## Sunday 28th February 2010

Visit [www.buildstore.co.uk/show](http://www.buildstore.co.uk/show) to book your tickets, find out more and start planning your day. Alternatively, call us on 0845 223 4455 to speak to someone about the Show.

- Live Demos
- Design & Build Theatre
- Product Presentations
- How To Theatre
- Case Study Theatre
- Walking Workshops

Times and content subject to change

Interested in eco? Then look out for our Eco Highlights logo on the following pages to find seminars that are particularly relevant to you.

## Live Demos in the Main Seminar Theatre

### **Paint & Varnish - Nutshell Paints**

Nutshell Paints will be demonstrating new products including Thermal Insulation Wall Paint (which reflects up to 92% of heat back into the home).

### **Green Roofs - Landmark Living Roofs**

Landmark will demonstrate a typical extensive green roof build up, showing all the components from start to finish.

### **Timber Windows - Mumford & Wood**

The Performance Windows Group demonstrates the correct procedures of window installation to ensure the perfect fit, finish and operation.

11.00

### **Roof Lights - Roto**

See what makes Roto Roof Windows unique and why they are easier and quicker to install than other brands.

-

### **Brick Cladding - Eurobrick**

Eurobrick Systems will be demonstrating the installation of their insulated brick slip cladding system.

15.30

### **Insulation - KDB**

KdB Insulation will be on hand to demonstrate how to achieve the best thermal performance for both new build or retrofit projects, as well as fitting airflex live in front of the audience and answering any questions you may have.

### **Flooring - Woodpecker Flooring**

Learn how to fit wood, cork and laminate flooring, including 'floating' floors which are ideal for home builders with limited floor-laying experience.

### **Stoves & Flues - Chimflue**

Chimflue will be demonstrating a gas fireplace with horizontal flue - an innovative yet simple solution to the problem which occurs when people wish to add a fireplace where no chimney exists.

### **Lime Plastering & Tadelakt Polished Plaster- Mike Wye & Associates**

Mike Wye & Associates will demonstrate the application of lime plaster, and also allow visitors to try their hand at Tadelakt plastering, particularly suited for use in bathrooms and wetrooms.

## Design & Build Theatre

### **11.30 - Project Management - Mike Hardwick, Self Build Adviser**

12.00

If you're considering managing your own self build or renovation project then be sure to catch this information-packed seminar by the Centre's own Project Management expert. Running through budgeting, costs, responsibilities, sequencing, utilities, security and much, much more; this seminar could be the key to a successful project!

### **12.30 - Timber Frame - Potton**

13.00

Timber frame construction is well placed to deliver sustainable net-zero-carbon Code Level 6 homes. Find out more in this seminar, which includes a brief introduction to the Code for Sustainability, U-values, Y-Values and Air Tightness.

### **13.30 - Brick & Block (Thin Joint) - Masonry Homes**

14.00

Masonry Homes will speak about how you can build an effective, eco and robust package home in masonry, utilising thin joint blockwork.

### **14.30 - Achieving the Code - Evolved Design Ltd**

15.00

In this informative seminar, Evolved Design will be offering advice on meeting current building regulations, Passive House or the Code for Sustainable Homes requirements.

### **15.30 - Super E - CFH**

16.00

Super E is a programme developed by the Canadian government to promote eco-friendly highly insulated homes for the 21st Century. The programme is built around an airtight controlled internal environment which allows occupants to economically heat and ventilate their homes.

## How To Seminars - in the Main Piazza

- 10.30 - 11.00**     ***Self Build & Renovation: Where Do I Start?* - Mike Hardwick, Project Management Adviser**  
In this introductory seminar, Mike Hardwick - our project management specialist - will talk you through the first steps if you're considering taking on a building project. One of the biggest stumbling blocks for would-be builders is not knowing where to start; in this useful seminar Mike will introduce you to the world of self build and renovation and the main elements you need to consider.
- 11.45 - 12.15**     ***Financing Your Project - BuildStore Finance Experts***  
In this information-packed seminar our Finance Experts will advise you on how best to raise funds for your project - no matter what scale it's on or whether it's a self build, renovation, conversion or home improvement.  
Repeated at 14.45.
- 12.30 - 13.00**     ***Finding A Plot or Project - BuildStore PlotSearch Specialist***  
The first step for many self builders and renovators is finding a plot to build a home on, or finding a property to renovate or convert. Via PlotSearch, BuildStore have helped many people find their ideal plots over the years and can give you plenty of tips and advice on where to search and what to look for.
- 13.15 - 13.45**     ***Purchasing Trades & Materials - Chris Newby, Materials Expert***  
Key elements when running your own project - sourcing efficient and professional tradesmen that you can rely on on-site; as well as purchasing good quality materials and product at the best possible prices. If you want your self build or renovation project to finish on time and within budget then it's vital you are confident in these areas.
- 14.00 - 14.30**     ***Energy Proofing Your Home - Dave Hilton, Eco Expert***   
If, like so many others, you're interested in bringing sustainability into your new home then don't miss this information-packed lecture. Dave Hilton is one of the industry's best-known eco experts and will answer all your energy-related questions clearly, avoiding using confusing jargon and helping you cut through the 'green wash'.
- 14.45 - 15.15**     ***Financing Your Project - BuildStore Finance Experts***  
As at 11.45.
- 15.30 - 16.00**     ***Finding A Plot or Project - BuildStore PlotSearch Specialist***  
As at 12.30.
- 16.15 - 16.45**     ***Purchasing Trades & Materials - Chris Newby, Materials Expert***  
As at 13.15.

## Walking Seminars

- 09.45 - 10.30**  
&  
**16.45 - 17.30**
- Self Build - Mike Hardwick, Project Management Specialist***  
**Dave Hilton - Eco Expert**   
Join Mike or Dave's Walking Seminars around the Self Build education journey and you'll learn everything you need to know about foundations, building systems, roofing and services supply. Seminars follow a set route but the content varies dependent on attendee questions and special interests; because of this numbers are limited - get here early to guarantee your place!
- Renovation - Sam Kirby, Renovation Expert***  
Sam will take you on a Walking Seminar of the EDF Energy Renovation House; as you go around this full-sized house she'll talk you through the problems which could arise during your own renovation and also suggest solutions. Again, these popular Seminars are led by visitor questions and interests so content will change each time they run.

## Case Study Seminars - in the PlotSearch Theatre

- 11.00 - 11.45** - **ICF (Insulated Concrete Formwork) - Beco Wallform**   
Already familiar with old buildings, Nick Fell extended his farmhouse home using Beco WALLFORM's Insulated Concrete Formwork. He'll be here to discuss the experience, outlining problems he encountered (and the solutions that went with them), quirks of the build and answering the key question - would he do it again?
- 12.30 - 13.15** - **Rainwater Harvesting - Rainwater Harvesting Ltd**   
*An Eco Home in a London Terrace.* When Jay Hayter and her partner, Chris Mead, bought a derelict cottage in South London in 2008, they knew nothing about green renovations. Two years later, their home is fitted with an air source heat pump, thermal solar panels to heat the water, a rainwater harvesting system and more than £6000 worth of wall and loft insulation. They have reduced their carbon emissions by more than 80%.
- 13.45 - 14.30** - **Timber Frame - Framewise**  
This seminar will provide you with an insight into a self build project, with hints and photos from start to finish as well the 'dos and don'ts' of building your dream home.
- 15.30 - 16.15** - **From Planning to Project Managing - Evolved Design**   
A fascinating insight into a self build case study that involved a unique method of construction and using just one company to undertake various project management functions on the client's behalf (ranging from specifying the initial design to obtaining Planning & Building Regs, providing a full SAP Assessment and supply and erection of a unique timber frame system).
- This house is a great example of a new build built with awareness of SAP and the Code for Sustainability. The timber frame was externally clad for added thermal mass, and natural sheepswool insulation used throughout.

## Product Presentations - in the Wolseley Theatre

- 11.00 - 11.30** - **Insulation - Xtratherm**   
Xtratherm's useful and informative presentation covers the topic of achieving energy efficient buildings whilst delivering cost effective designs, using traditional building methods.
- 11.30 - 11.45** - **Fire Protection - Prestige Fire Protection**  
Prestige will be hosting an education forum where you will learn more about the fire safety regulations you need to be aware of during the course of your self build or renovation project.
- 12.00 - 12.30** - **Eco Technologies - Wolseley**   
Find out how Wolseley UK can help you harness solar energy through the mediums of Photovoltaics and Solar Panels to provide real environmental and financial benefit to your project.
- 13.00 - 13.30** - **Air Tightness, Insulation & Ventilation - Villavent**   
Villavent's seminar covers the principles of air tightness, insulation & ventilation; including the forthcoming changes to Part F (Ventilation Regulations) and principles of system design and potential problem areas; as well as explaining how a heat recovery system works and why it might work for your home.
- 14.00 - 14.30** - **Loft Conversions - Telebeam**  
Telebeam have designed an innovative loft conversion system that does away with the requirement for large cranes and heavy steel beams; learn more in their short presentation.
- 15.00 - 15.30** - **Solar - Baxi Group**   
Learn about the benefits of using solar thermal and the Baxi Solarflo range of in-roof, on-roof and evacuated tube packages available.
